

# ARE YOU DOING DEVOPS RIGHT?

Digital transformation is driving agile transformations and the adoption of DevOps philosophies. More than 80% of our customers worldwide have reported that they have adopted some principles and practices of DevOps. But how do you know if you have been successful in implementing your strategies? Take this **15-step self-evaluation** to determine your DevOps score. Calculate the results below and find out if you are a DevOps ninja, a novice, or somewhere in between!

## What's Your DevOps Score?

YES = 1      NO = 0

1. Are you leveraging automation as much as possible, from deployment to production? Can you automatically roll back for each change, if there are problems?
2. Do you do continuous integration with automated unit testing at every possible point?
3. Do you have considerably more resources devoted to automated testing than manual testing?
4. Do you have frequent, rapid release cycles? Does your deployment frequency remain stable or trend up from week to week?
5. Is your Lead Time (from Dev to Deploy) reducing over time as you get a better hold over the software lifecycle?
6. Do you manage to catch code quality issues early in development, much before they get to production?
7. Have you organizationally re-structured your development and operations teams to create an integrated team?
8. Do your development and operations teams share tools?
9. Is information generated from tools shared between developers and operations engineers?
10. Would you consider knowledge sharing between your development and operations teams to be open and dynamic?
11. Do SLAs between business, development, and operations have common business-oriented goals?
12. Do all stakeholders have full visibility of change to support collaboration?
13. Can your monitoring solutions predict issues before users are affected?
14. Do you have well-defined, continuous feedback systems in place to drive continuous assessment and progress?
15. Are you continuously seeking repeatable standardized processes for all key activities along your value chain?

### YOUR SCORECARD

**0-5 points**

**6-10 points**

**11-15 points**

**You're a DevOps novice**

You're at the beginning of your journey. Plan it well.

**You're making strides**

You're experimenting with different strategies and have had some hits and misses. Keep going.

**Well done! You're a Rising Star**

Extend across the organization. You can never over-collaborate and over-improve.
